EDUCATION

Sahyadri College of Engineering and Management

Bachelor of Engineering in Computer Science

Adyar, Mangaluru

Sep 2025 – 2029

St Aloysius Pre University College

PCMC

Mangaluru

Jun 2023 – May 2025

EXPERIENCE

Smart India Hackathon

Sep 2025

- Worked with a team to research and develop ideas for an AR/VR based educational solution focused on disaster preparedness for the government of Punjab.
- Contributed to discussions around problem solving, feature planning, presentations, and overall solution design in a collaborative environment.
- Made it to the second internal round of SIH 2025 where we presented our ideas online

HackToFuture

March 2026

- Worked towards the idea pitching round where we submitted our problem statement in ppt round
- Contributed towards an idea called Careby , an AI powered parenting coach

PROJECTS

Water Hydration Tracker | *Personal Project — HTML, CSS, JavaScript*

- Developed a web based hydration tracker that allows users to monitor their daily water intake and track progress toward hydration goals.
- Implemented interactive features using JavaScript to update water consumption levels and provide real time feedback.
- a responsive and user friendly interface using HTML and CSS to ensure an intuitive user experience.

NutriGuide | *Personal Project — Antigravity, Kaggle Dataset*

- Developed a web application that works as a online microlearning platform for parents to inculcate healthy eating habits for their kids .
- Implemented ideas like constraint based filtering and rule based scoring to score and give personalized plan of recipes which was sourced from kaggle datasets.
- Has a clean and simple structure that is easy to navigate.

TECHNICAL SKILLS

Languages: Basics of C/C++ and Python

Developer Tools: VS Code , Jupyter notebook
